SYNTHETIC FIXTURE - not a real person

EXPERIENCE

Senior Software Engineer, Meridian Health Systems

since April 2024

Software Engineer, Meridian Health Systems

July 2020 to March 2024, same employer

- The go-live held. No dropped messages in the twenty months since. The runbook became the template Meridian uses for every hospital go-live. (hospital size 900 beds; dropped messages since 0; batch window 30 to 90 seconds; hours alone before calling the vendor 4)
- The rewrite was shelved. Page loads went from 4.2 seconds to 900 milliseconds, and the customer went live a month early. The architecture was never rebuilt and has not needed to be. (share of slow requests from three queries 80%; page load before 4.2 seconds; page load after 900 milliseconds; rewrite timeline avoided 6 months)
- No appointments were permanently lost. The schema check he added has blocked four migrations since, two of which would have been worse than his. He was promoted eighteen months later and his manager cited how he handled this. (patient records affected about 1,100; time to restore 2 hours; migrations the new check has blocked since 4)
- The screen was changed. The paper workaround stopped. He asked to join product reviews after that and has sat in them since. (days on the ward 3; nurses shadowed 4; months to get the change prioritised 2)

EDUCATION

B.Tech in Computer Science, Vellore Institute of Technology, 2020

8.4 out of 10

ADDITIONAL

English, Hindi, Tamil

705 (Q50 V34, taken September 2026)

Runs a Saturday coding class for 12 government-school students in Bengaluru, since 2023
